Professional Summary

Software Developer with a B.Tech in Electronics and Communication Engineering and hands-on experience in Python, SQL, relational databases, Django REST Framework, and React.js. Strong foundation in programming logic, with experience working with MySQL and PostgreSQL and building backend functionality for full-stack applications. Interested in developing responsive, user-friendly web applications and building clean, maintainable, and scalable software.

Technical Skills

- **Programming Languages:** Python
- **Frontend:** HTML5, CSS3, JavaScript, Bootstrap, React.js
- **Backend:** Django
- **Database:** MySQL, PostgreSQL, MongoDB
- **API Platform:** Postman
- **Testing:** Pytest
- **Development Tools & Platforms:** Git, GitHub, Docker, Vercel, Linux
- **AI Tools:** ChatGPT, Claude, Antigravity
- **Core Skills:** Responsive Web Development, UI Development, Debugging
- **Soft Skills:** Problem Solving, Teamwork, Communication, Documentation

Projects

StockPilot – Smart Inventory & Demand Management SaaS

- Developed a backend-focused inventory management application using Django REST Framework and PostgreSQL with organization-based data separation.
- Designed relational database models for organizations, users, products, warehouses, and stock movements using primary and foreign key relationships.
- Implemented RESTful APIs for inventory management and integrated JWT-based authentication for secure API access.
- Developed business logic to calculate current product stock from stock movement records across products, warehouses, and organizations.
- Built analytics API functionality for inventory summaries and tested REST endpoints using Postman.
- Used Git and GitHub for source-code management and followed modular Django application architecture.

Personal Portfolio Website

- Developed a responsive personal portfolio website using React.js and Tailwind CSS to showcase projects, technical skills, and professional information.
- Created reusable React components and responsive layouts for different screen sizes.
- Deployed the application using Vercel and managed source code using Git and GitHub.

Figma to Code – Responsive Website

- Converted a Figma UI design into a responsive React.js web application using reusable components.
- Implemented responsive layouts using Tailwind CSS with a focus on clean component structure and maintainable frontend code.
- Optimized the interface for different screen sizes to provide a consistent user experience.

Iron Guard – IoT Smart Iron with Predictive Thermal Control

- Designed an IoT-enabled smart ironing system with temperature monitoring, feedback control, and appliance safety features.
- Implemented temperature sensing and automated control logic for safe operation.
- Developed embedded logic for fault detection and automatic shutdown.

Experience

Web Developer Intern ***Medowa Global Venture Pvt Ltd***

Technopark, Thiruvananthapuram, Kerala

- Develop responsive websites with a focus on clean layouts, intuitive navigation, and user-friendly web experiences.
- Design and implement web interfaces with attention to visual consistency, usability, and responsive behavior across desktop, tablet, and mobile devices.
- Build frontend components and website functionality using appropriate web technologies to deliver maintainable and accessible interfaces.

Software Developer ***SMEC Technologies***

- Developed programming fundamentals through practical work with Python, including Object-Oriented Programming, file handling, data structures, and problem-solving exercises.
- Worked with HTML, CSS, JavaScript, and React.js to understand frontend development and responsive web application structure.
- Gained hands-on experience with Django and Django REST Framework for backend development, CRUD operations, and REST API concepts.
- Practiced relational database concepts using MySQL and PostgreSQL, including table creation, relationships, SQL queries, joins, filtering, aggregation, and database operations.
- Used Git and GitHub for source-code management and developed familiarity with Docker, Linux, Postman, and software testing practices.

Certifications

- Foundations of IoT and Embedded Systems – Udemy
- Complete Guide to Build IoT Things from Scratch to Market – Udemy

Education

- **B.Tech in Electronics and Communication** – College of Engineering Chengannur **2022–2026**
- **Higher Secondary** – Holy Angels Model School, Pathanamthitta **2022**
- **Secondary** – Holy Angels Model School, Pathanamthitta **2020**
